The National Public Health Performance Standards (NPHPS) was developed collaboratively by the program's national partner organizations. The NPHPS partner organizations include: Centers for Disease Control and Prevention (CDC); American Public Health Association (APHA); Association of State and Territorial Health Officials (ASTHO); National Association of County and City Health Officials (NACCHO); National Association of Local Boards of Health (NALBOH); National Network of Public Health Institutes (NNPHI); and then Public Health Foundation (PHF). We thank the staff of these organizations for their time and expertise in the support of the NPHPS.

Background

The NPHPS is a partnership effort to improve the practice of public health and the performance of public health systems. The NPHPS assessment instruments guide state and local jurisdictions in evaluating their current performance against a set of optimal standards. Through these assessments, responding sites can consider the activities of all public health system partners, thus addressing the activities of all public, private and voluntary entities that contribute to public health within the community.

The NPHPS assessments are intended to help users answer questions such as "What are the components, activities, competencies, and capacities of our public health system?" and "How well are the ten Essential Public Health Services being provided in our system?" The dialogue that occurs in the process of answering the questions in the assessment instrument can help to identify strengths and weaknesses, determine opportunities for immediate improvements, and establish priorities for long term investments for improving the public health system.

Three assessment instruments have been designed to assist state and local partners in assessing and improving their public health systems or boards of health. These instruments are the:

- State Public Health System Performance Assessment Instrument,
- Local Public Health System Performance Assessment Instrument, and
- Public Health Governing Entity Performance Assessment Instrument.

The information obtained from assessments may then be used to improve and better coordinate public health activities at state and local levels. In addition, the results gathered provide an understanding of how state and local public health systems and governing entities are performing. This information helps local, state and national partners make better and more effective policy and resource decisions to improve the nation's public health as a whole.

Introduction

The NPHPS Local Public Health System Assessment Report is designed to help health departments and public health system partners create a snapshot of where they are relative to the National Public Health Performance Standards and to progressively move toward refining and improving outcomes for performance across the public health system.

The NPHPS state, local, and governance instruments also offer opportunity and robust data to link to health departments, public health system partners and/or community-wide strategic planning processes, as well as to Public Health Accreditation Board (PHAB) standards. For example, assessment of the environment external to the public health organization is a key component of all strategic planning, and the NPHPS assessment readily provides a structured process and an evidence-base upon which key organizational decisions may be made and priorities established. The assessment may also be used as a component of community health improvement planning processes, such as Mobilizing for Action through Planning and Partnerships (MAPP) or other community-wide strategic planning efforts, including state health improvement planning and community health improvement planning. The NPHPS process also drives assessment and improvement activities that may be used to support a Health Department in meeting PHAB standards. Regardless of whether using MAPP or another health improvement process, partners should use the NPHPS results to support quality improvement.

The self-assessment is structured around the Model Standards for each of the ten Essential Public Health Services, (EPHS), hereafter referred to as the Essential Services, which were developed through a comprehensive, collaborative process involving input from national, state and local experts in public health. Altogether, for the local assessment, 30 Model Standards serve as quality indicators that are organized into the ten essential public health service areas in the instrument and address the three core functions of public health. Figure 1 below shows how the ten Essential Services align with the three Core Functions of Public Health.

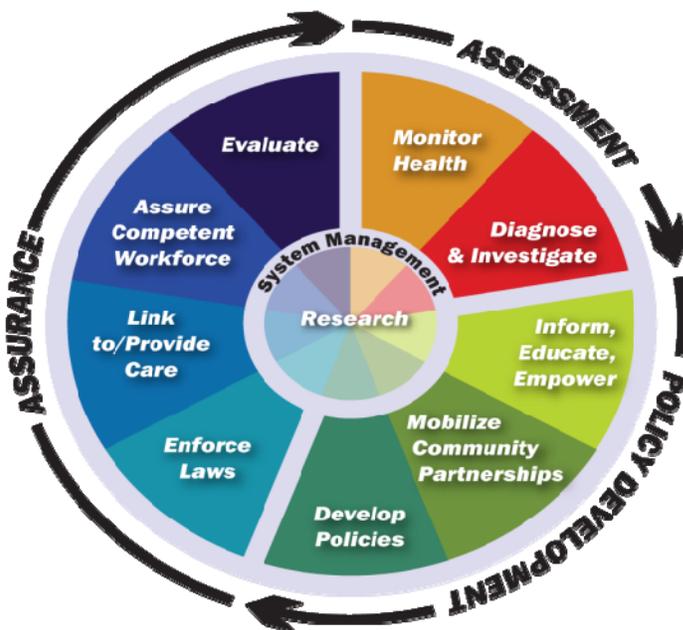

Figure 1. The ten Essential Public Health Services and how they relate to the three Core Functions of Public Health.

Purpose

The primary purpose of the NPHPS Local Public Health System Assessment Report is to promote continuous improvement that will result in positive outcomes for system performance. Local health departments and their public health system partners can use the Assessment Report as a working tool to:

- Better understand current system functioning and performance;
- Identify and prioritize areas of strengths, weaknesses, and opportunities for improvement;
- Articulate the value that quality improvement initiatives will bring to the public health system;
- Develop an initial work plan with specific quality improvement strategies to achieve goals;
- Begin taking action for achieving performance and quality improvement in one or more targeted areas; and
- Re-assess the progress of improvement efforts at regular intervals.

This report is designed to facilitate communication and sharing among and within programs, partners, and organizations, based on a common understanding of how a high performing and effective public health system can operate. This shared frame of reference will help build commitment and focus for setting priorities and improving public health system performance. Outcomes for performance include delivery of all ten essential public health services at optimal levels.

About the Report

Calculating the Scores

The NPHPS assessment instruments are constructed using the ten Essential Services as a framework. Within the Local Instrument, each Essential Service includes between 2-4 Model Standards that describe the key aspects of an optimally performing public health system. Each Model Standard is followed by assessment questions that serve as measures of performance. Responses to these questions indicate how well the Model Standard - which portrays the highest level of performance or "gold standard" - is being met.

Table 1 below characterizes levels of activity for Essential Services and Model Standards. Using the responses to all of the assessment questions, a scoring process generates score for each Model Standard, Essential Service, and one overall assessment score.

Table 1. Summary of Assessment Response Options

Optimal Activity (76-100%)	Greater than 75% of the activity described within the question is met.
Significant Activity (51-75%)	Greater than 50%, but no more than 75% of the activity described within the question is met.
Moderate Activity (26-50%)	Greater than 25%, but no more than 50% of the activity described within the question is met.
Minimal Activity (1-25%)	Greater than zero, but no more than 25% of the activity described within the question is met.
No Activity (0%)	0% or absolutely no activity.

Understanding Data Limitations

There are a number of limitations to the NPHPS assessment data due to self-report, wide variations in the breadth and knowledge of participants, the variety of assessment methods used, and differences in interpretation of assessment questions. Data and resultant information should not be interpreted to reflect the capacity or performance of any single agency or organization within the public health system or used for comparisons between jurisdictions or organizations. Use of NPHPS generated data and associated recommendations are limited to guiding an overall public health infrastructure and performance improvement process for the public health system as determined by organizations involved in the assessment.

All performance scores are an average; Model Standard scores are an average of the question scores within that Model Standard, Essential Service scores are an average of the Model Standard scores within that Essential Service and the overall assessment score is the average of the Essential Service scores. The responses to the questions within the assessment are based upon processes that utilize input from diverse system participants with different experiences and perspectives. The gathering of these inputs and the development of a response for each question incorporates an element of subjectivity, which may be minimized through the use of particular assessment methods. Additionally, while certain assessment methods are recommended, processes differ among sites. The assessment methods are not fully standardized and these differences in administration of the self-assessment may introduce an element of measurement error. In addition, there are differences in knowledge about the public health system among assessment participants. This may lead to some interpretation differences and issues for some questions, potentially introducing a degree of random non-sampling error.

Presentation of results

The NPHPS has attempted to present results - through a variety of figures and tables - in a user-friendly and clear manner. For ease of use, many figures and tables use short titles to refer to Essential Services, Model Standards, and questions. If you are in doubt of these definitions, please refer to the full text in the assessment instruments.

Sites may have chosen to complete two additional questionnaires, the Priority of Model Standards Questionnaire assesses how performance of each Model Standard compares with the priority rating and the Agency Contribution Questionnaire assesses the local health department's contribution to achieving the Model Standard. Sites that submitted responses for these questionnaires will see the results included as additional components of their report.

Results

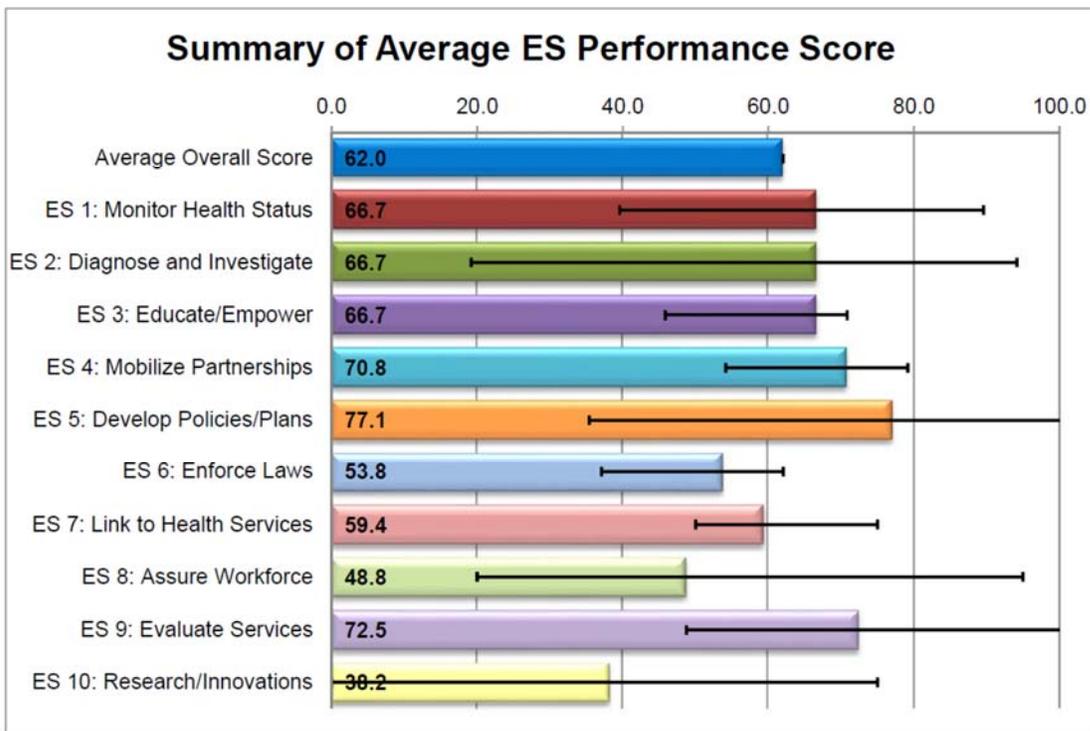

Now that your assessment is completed, one of the most exciting, yet challenging opportunities is to begin to review and analyze the findings. As you recall from your assessment, the data you created now establishes the foundation upon which you may set priorities for performance improvement and identify specific quality improvement (QI) projects to support your priorities.

Based upon the responses you provided during your assessment, an average was calculated for each of the ten Essential Services. Each Essential Service score can be interpreted as the overall degree to which your public health system meets the performance standards (quality indicators) for each Essential Service. Scores can range from a minimum value of 0% (no activity is performed pursuant to the standards) to a maximum value of 100% (all activities associated with the standards are performed at optimal levels).

Figure 2 displays the average score for each Essential Service, along with an overall average assessment score across all ten Essential Services. Take a look at the overall performance scores for each Essential Service. Examination of these scores can immediately give a sense of the local public health system's greatest strengths and weaknesses. Note the black bars that identify the range of reported performance score responses within each Essential Service.

Overall Scores for Each Essential Public Health Service

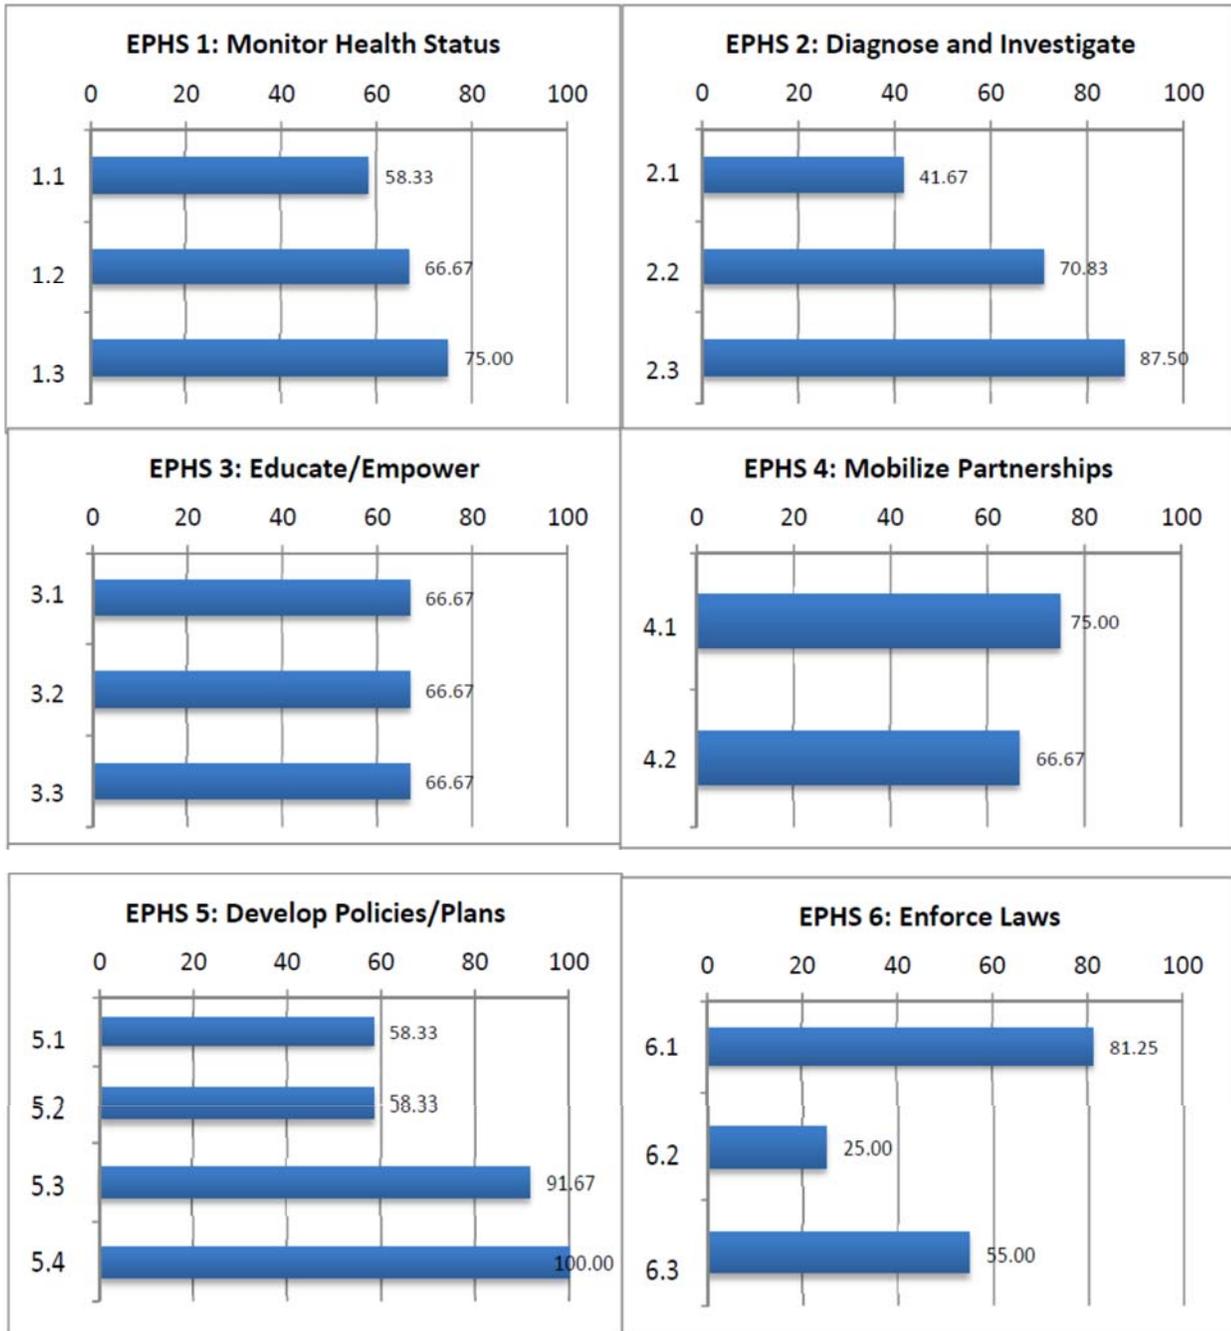

Figure 2. Summary of Average Essential Public Health Service Performance Scores

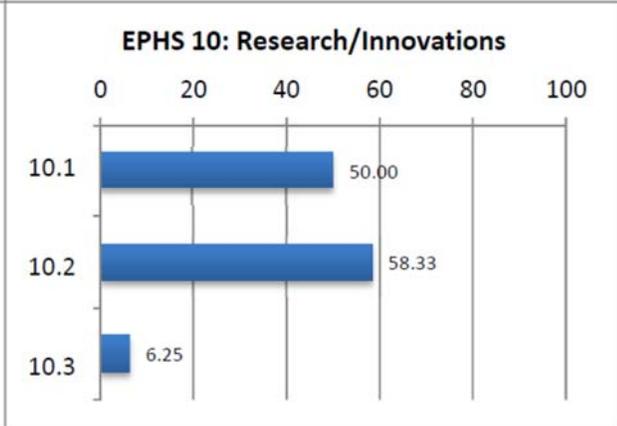

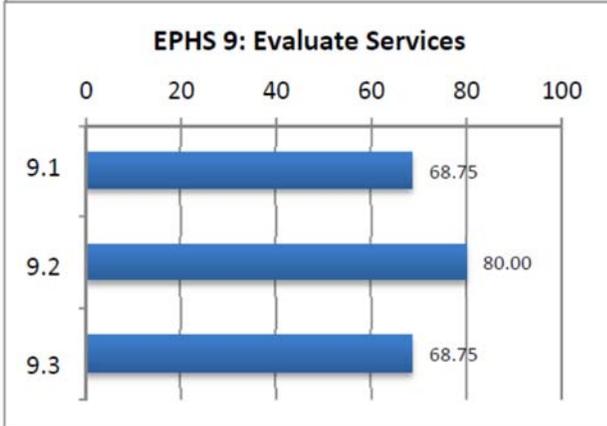

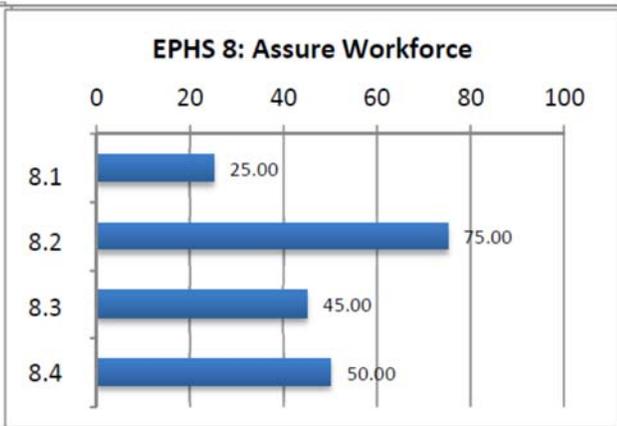

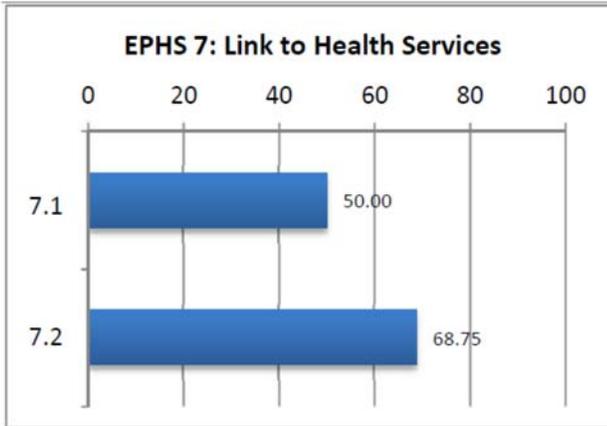

Performance Scores by Essential Public Health Service for Each Model Standard

Figure 3 and Table 2 on the following pages display the average performance score for each of the Model Standards within each Essential Service. This level of analysis enables you to identify specific activities that contributed to high or low performance within each Essential Service.

Figure 3. Performance Scores by Essential Public Health Service for Each Model Standard

In Table 2 below, each score (performance, priority, and contribution scores) at the Essential Service level is a calculated average of the respective Model Standard scores within that Essential Service. Note – The priority rating and agency contribution scores will be blank if the Priority of Model Standards Questionnaire and the Agency Contribution Questionnaire are not completed.

Table 2. Overall Performance, Priority, and Contribution Scores by Essential Public Health Service and Corresponding Model Standard

Model Standards by Essential Services	Performance Scores	Priority Rating	Agency Contribution Scores
ES 1: Monitor Health Status	66.7		
1.1 Community Health Assessment	58.3		
1.2 Current Technology	66.7		
1.3 Registries	75.0		
ES 2: Diagnose and Investigate	66.7		
2.1 Identification/Surveillance	41.7		
2.2 Emergency Response	70.8		
2.3 Laboratories	87.5		
ES 3: Educate/Empower	66.7		
3.1 Health Education/Promotion	66.7		
3.2 Health Communication	66.7		
3.3 Risk Communication	66.7		
ES 4: Mobilize Partnerships	70.8		
4.1 Constituency Development	75.0		
4.2 Community Partnerships	66.7		
ES 5: Develop Policies/Plans	77.1		
5.1 Governmental Presence	58.3		
5.2 Policy Development	58.3		
5.3 CHIP/Strategic Planning	91.7		
5.4 Emergency Plan	100.0		
ES 6: Enforce Laws	53.8		
6.1 Review Laws	81.3		
6.2 Improve Laws	25.0		
6.3 Enforce Laws	55.0		
ES 7: Link to Health Services	59.4		
7.1 Personal Health Service Needs	50.0		
7.2 Assure Linkage	68.8		
ES 8: Assure Workforce	48.8		
8.1 Workforce Assessment	25.0		
8.2 Workforce Standards	75.0		
8.3 Continuing Education	45.0		
8.4 Leadership Development	50.0		
ES 9: Evaluate Services	72.5		
9.1 Evaluation of Population Health	68.8		
9.2 Evaluation of Personal Health	80.0		
9.3 Evaluation of LPHS	68.8		
ES 10: Research/Innovations	38.2		
10.1 Foster Innovation	50.0		
10.2 Academic Linkages	58.3		
10.3 Research Capacity	6.3		
Average Overall Score	62.0	NA	NA
Median Score	66.7	NA	NA

Performance Relative to Optimal Activity

Figures 4 and 5 display the proportion of performance measures that met specified thresholds of achievement for performance standards. The five threshold levels of achievement used in scoring these measures are shown in the legend below. For example, measures receiving a composite score of 76-100% were classified as meeting performance standards at the optimal level.

Figure 4. Percentage of the system's Essential Services scores that fall within the five activity categories. This chart provides a high level snapshot of the information found in Figure 2, summarizing the composite performance measures for all 10 Essential Services.

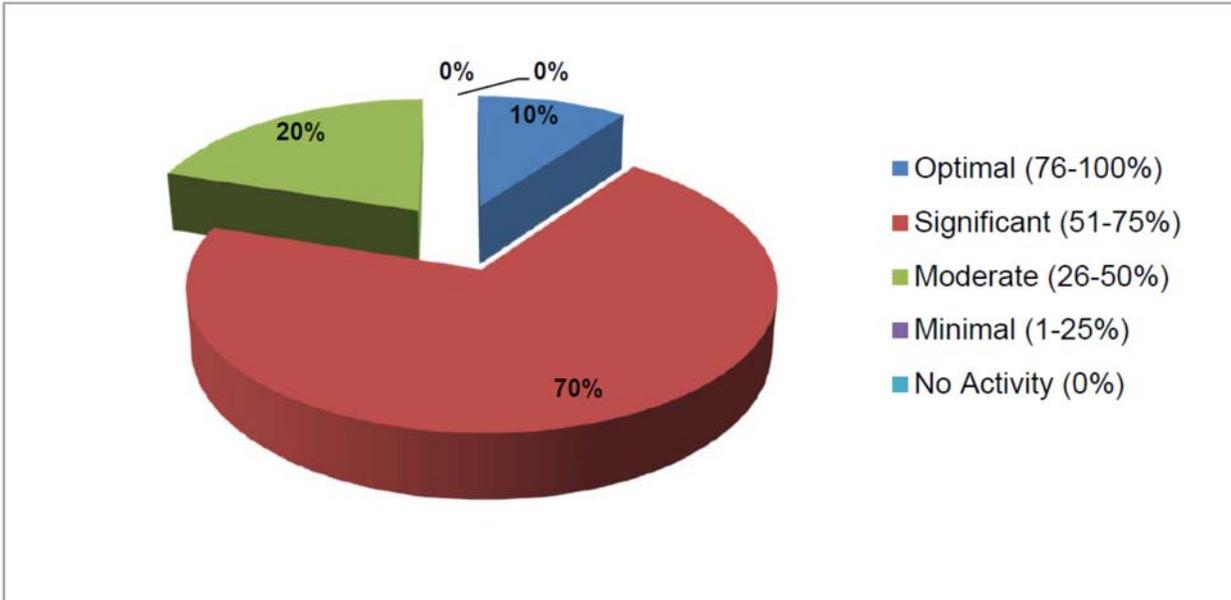

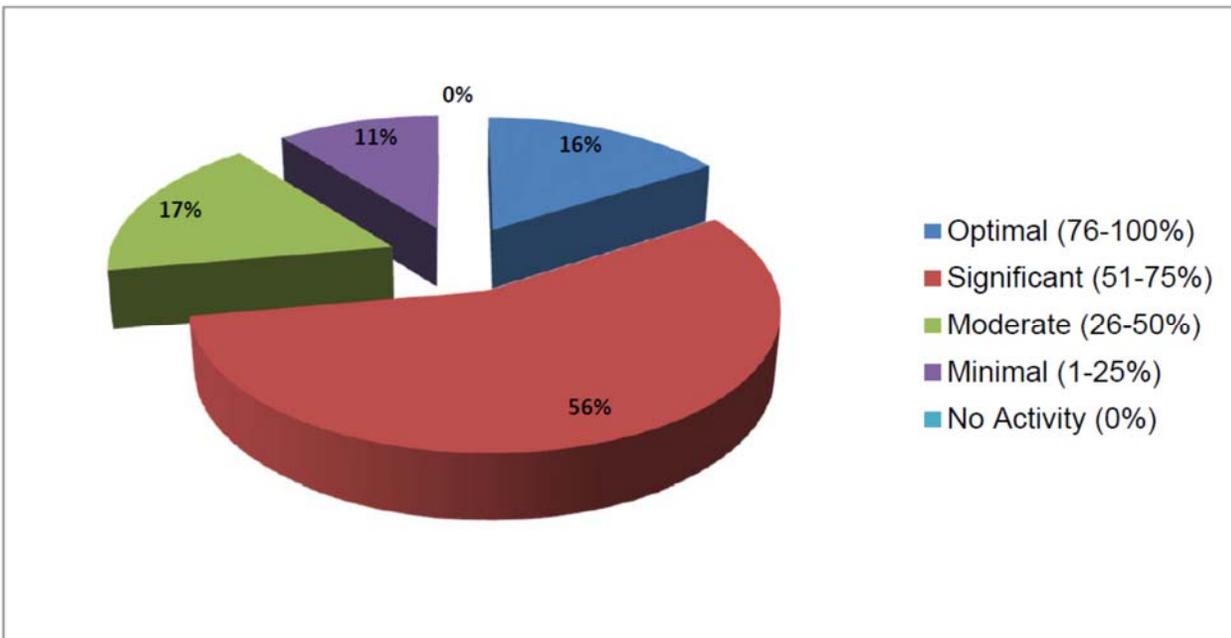

Figure 5. Percentage of the system's Model Standard scores that fall within the five activity categories. This chart provides a high level snapshot of the information found in Figure 3, summarizing the composite measures for all 30 Model Standards.

Analysis and Discussion Questions

Having a standard way in which to analyze the data in this report is important. This process does not have to be difficult; however, drawing some initial conclusions from your data will prove invaluable as you move forward with your improvement efforts. It is crucial that participants fully discuss the performance assessment results. The bar graphs, charts, and summary information in the Results section of this report should be helpful in identifying high and low performing areas. Please refer to Appendix H of the Local Assessment Implementation Guide. This referenced set of discussion questions will to help guide you as you analyze the data found in the previous sections of this report.

Using the results in this report will help you to generate priorities for improvement, as well as possible improvement projects. Your data analysis should be an interactive process, enabling everyone to participate. Do not be overwhelmed by the potential of many possibilities for QI projects – the point is not that you have to address them all now. Consider this step as identifying possible opportunities to enhance your system performance. Keep in mind both your quantitative data (Appendix A) and the qualitative data that you collected during the assessment (Appendix B).

Next Steps

Congratulations on your participation in the local assessment process. A primary goal of the NPHPS is that data is used proactively to monitor, assess, and improve the quality of essential public health services. This report is an initial step to identifying immediate actions and activities to improve local initiatives. The results in this report may also be used to identify longer-term priorities for improvement, as well as possible improvement projects.

As noted in the Introduction of this report, NPHPS data may be used to inform a variety of organization and/or systems planning and improvement processes. Plan to use both quantitative data (Appendix A) and qualitative data (Appendix B) from the assessment to identify improvement opportunities. While there may be many potential quality improvement projects, do not be overwhelmed – the point is not that you have to address them all now. Rather, consider this step as a way to identify possible opportunities to enhance your system performance and plan to use the guidance provided in this section, along with the resources offered in Appendix C, to develop specific goals for improvement within your public health system and move from assessment and analysis toward action.

Note: Communities implementing Mobilizing for Action through Planning and Partnerships (MAPP) may refer to the MAPP guidance for considering NPHPS data along with other assessment data in the Identifying Strategic Issues phase of MAPP.

Action Planning

In any systems improvement and planning process, it is important to involve all public health system partners in determining ways to improve the quality of essential public health services provided by the system. Participation in the improvement and planning activities included in your action plan is the responsibility of all partners within the public health system.

Consider the following points as you build an Action Plan to address the priorities you have identified

- Each public health partner should be considered when approaching quality improvement for your system
- The success of your improvement activities are dependent upon the active participation and contribution of each and every member of the system
- An integral part of performance improvement is working consistently to have long-term effects
- A multi-disciplinary approach that employs measurement and analysis is key to accomplishing and sustaining improvements

You may find that using the simple acronym, 'FOCUS' is a way to help you to move from assessment and analysis to action.

F Find an opportunity for improvement using your results.

O Organize a team of public health system partners to work on the improvement. Someone in the group should be identified as the team leader. Team members should represent the appropriate organizations that can make an impact.

C Consider the current process, where simple improvements can be made and who should make the improvements.

U Understand the problem further if necessary, how and why it is occurring, and the factors that contribute to it. Once you have identified priorities, finding solutions entails delving into possible reasons, or "root causes," of the weakness or problem. Only when participants determine why performance problems (or successes!) have occurred will they be able to identify workable solutions that improve future performance. Most performance issues may be traced to well-defined system causes, such as policies, leadership, funding, incentives, information, personnel or coordination. Many QI tools are applicable. You may consider using a variety of basic QI tools such as brainstorming, 5-whys, prioritization, or cause and effect diagrams to better understand the problem (refer to Appendix C for resources).

S Select the improvement strategies to be made. Consider using a table or chart to summarize your Action Plan. Many resources are available to assist you in putting your plan on paper, but in general you'll want to include the priority selected, the goal, the improvement activities to be conducted, who will carry them out, and the timeline for completing the improvement activities. When complete, your Action Plan should contain documentation on the indicators to be used, baseline performance levels and targets to be achieved, responsibilities for carrying out improvement activities and the collection and analysis of data to monitor progress. (Additional resources may be found in Appendix C.)

Monitoring and Evaluation: Keys to Success

Monitoring your action plan is a highly proactive and continuous process that is far more than simply taking an occasional "snap-shot" that produces additional data. Evaluation, in contrast to monitoring, provides ongoing structured information that focuses on why results are or are not being met, what unintended consequences may be, or on issues of efficiency, effectiveness, and/or sustainability.

After your Action Plan is implemented, monitoring and evaluation continues to determine whether quality improvement occurred and whether the activities were effective. If the Essential Service performance does not improve within the expected time, additional evaluation must be conducted (an additional QI cycle) to determine why and how you can update your Action Plan to be more effective. The Action Plan can be adjusted as you continue to monitor and evaluate your efforts.

APPENDIX A: Individual Questions and Responses

Performance Scores

ESSENTIAL SERVICE 1: Monitor Health Status to Identify Community Health Problems		
1.1	Model Standard: Population-Based Community Health Assessment (CHA) <i>At what level does the local public health system:</i>	
1.1.1	Conduct regular community health assessments?	50
1.1.2	Continuously update the community health assessment with current information?	75
1.1.3	Promote the use of the community health assessment among community members and partners?	50
1.2	Model Standard: Current Technology to Manage and Communicate Population Health Data <i>At what level does the local public health system:</i>	
1.2.1	Use the best available technology and methods to display data on the public's health?	75
1.2.2	Analyze health data, including geographic information, to see where health problems exist?	50
1.2.3	Use computer software to create charts, graphs, and maps to display complex public health data (trends over time, sub-population analyses, etc.)?	75
1.3	Model Standard: Maintenance of Population Health Registries <i>At what level does the local public health system:</i>	
1.3.1	Collect data on specific health concerns to provide the data to population health registries in a timely manner, consistent with current standards?	75
1.3.2	Use information from population health registries in community health assessments or other analyses?	75

ESSENTIAL SERVICE 2: Diagnose and Investigate Health Problems and Health Hazards		
2.1	Model Standard: Identification and Surveillance of Health Threats <i>At what level does the local public health system:</i>	
2.1.1	Participate in a comprehensive surveillance system with national, state and local partners to identify, monitor, share information, and understand emerging health problems and threats?	50
2.1.2	Provide and collect timely and complete information on reportable diseases and potential disasters, emergencies and emerging threats (natural and manmade)?	50
2.1.3	Assure that the best available resources are used to support surveillance systems and activities, including information technology, communication systems, and professional expertise?	25

2.2	Model Standard: Investigation and Response to Public Health Threats and Emergencies <i>At what level does the local public health system:</i>	
2.2.1	Maintain written instructions on how to handle communicable disease outbreaks and toxic exposure incidents, including details about case finding, contact tracing, and source identification and containment?	75
2.2.2	Develop written rules to follow in the immediate investigation of public health threats and emergencies, including natural and intentional disasters?	75
2.2.3	Designate a jurisdictional Emergency Response Coordinator?	100
2.2.4	Prepare to rapidly respond to public health emergencies according to emergency operations coordination guidelines?	50
2.2.5	Identify personnel with the technical expertise to rapidly respond to possible biological, chemical, or and nuclear public health emergencies?	75
2.2.6	Evaluate incidents for effectiveness and opportunities for improvement?	50
2.3	Model Standard: Laboratory Support for Investigation of Health Threats <i>At what level does the local public health system:</i>	
2.3.1	Have ready access to laboratories that can meet routine public health needs for finding out what health problems are occurring?	75
2.3.2	Maintain constant (24/7) access to laboratories that can meet public health needs during emergencies, threats, and other hazards?	75
2.3.3	Use only licensed or credentialed laboratories?	100
2.3.4	Maintain a written list of rules related to laboratories, for handling samples (collecting, labeling, storing, transporting, and delivering), for determining who is in charge of the samples at what point, and for reporting the results?	100

ESSENTIAL SERVICE 3: Inform, Educate, and Empower People about Health Issues

3.1	Model Standard: Health Education and Promotion <i>At what level does the local public health system:</i>	
3.1.1	Provide policymakers, stakeholders, and the public with ongoing analyses of community health status and related recommendations for health promotion policies?	50
3.1.2	Coordinate health promotion and health education activities to reach individual, interpersonal, community, and societal levels?	75
3.1.3	Engage the community throughout the process of setting priorities, developing plans and implementing health education and health promotion activities?	75
3.2	Model Standard: Health Communication <i>At what level does the local public health system:</i>	

3.2.1	Develop health communication plans for relating to media and the public and for sharing information among LPHS organizations?	75
3.2.2	Use relationships with different media providers (e.g. print, radio, television, and the internet) to share health information, matching the message with the target audience?	75
3.2.3	Identify and train spokespersons on public health issues?	50
3.3	Model Standard: Risk Communication <i>At what level does the local public health system:</i>	
3.3.1	Develop an emergency communications plan for each stage of an emergency to allow for the effective dissemination of information?	75
3.3.2	Make sure resources are available for a rapid emergency communication response?	75
3.3.3	Provide risk communication training for employees and volunteers?	50

ESSENTIAL SERVICE 4: Mobilize Community Partnerships to Identify and Solve Health Problems

4.1	Model Standard: Constituency Development <i>At what level does the local public health system:</i>	
4.1.1	Maintain a complete and current directory of community organizations?	75
4.1.2	Follow an established process for identifying key constituents related to overall public health interests and particular health concerns?	75
4.1.3	Encourage constituents to participate in activities to improve community health?	75
4.1.4	Create forums for communication of public health issues?	75
4.2	Model Standard: Community Partnerships <i>At what level does the local public health system:</i>	
4.2.1	Establish community partnerships and strategic alliances to provide a comprehensive approach to improving health in the community?	75
4.2.2	Establish a broad-based community health improvement committee?	75
4.2.3	Assess how well community partnerships and strategic alliances are working to improve community health?	50

ESSENTIAL SERVICE 5: Develop Policies and Plans that Support Individual and Community Health Efforts

5.1	Model Standard: Governmental Presence at the Local Level <i>At what level does the local public health system:</i>	
5.1.1	Support the work of a local health department dedicated to the public health to make sure the essential public health services are provided?	75

5.1.2	See that the local health department is accredited through the national voluntary accreditation program?	50
5.1.3	Assure that the local health department has enough resources to do its part in providing essential public health services?	50
5.2	Model Standard: Public Health Policy Development <i>At what level does the local public health system:</i>	
5.2.1	Contribute to public health policies by engaging in activities that inform the policy development process?	100
5.2.2	Alert policymakers and the community of the possible public health impacts (both intended and unintended) from current and/or proposed policies?	75
5.2.3	Review existing policies at least every three to five years?	100
5.3	Model Standard: Community Health Improvement Process and Strategic Planning <i>At what level does the local public health system:</i>	
5.3.1	Establish a community health improvement process, with broad-based diverse participation, that uses information from both the community health assessment and the perceptions of community members?	100
5.3.2	Develop strategies to achieve community health improvement objectives, including a description of organizations accountable for specific steps?	75
5.3.3	Connect organizational strategic plans with the Community Health Improvement Plan?	100
5.4	Model Standard: Plan for Public Health Emergencies <i>At what level does the local public health system:</i>	
5.4.1	Support a workgroup to develop and maintain preparedness and response plans?	100
5.4.2	Develop a plan that defines when it would be used, who would do what tasks, what standard operating procedures would be put in place, and what alert and evacuation protocols would be followed?	100
5.4.3	Test the plan through regular drills and revise the plan as needed, at least every two years?	100

ESSENTIAL SERVICE 6: Enforce Laws and Regulations that Protect Health and Ensure Safety

6.1	Model Standard: Review and Evaluation of Laws, Regulations, and Ordinances <i>At what level does the local public health system:</i>	
6.1.1	Identify public health issues that can be addressed through laws, regulations, or ordinances?	75
6.1.2	Stay up-to-date with current laws, regulations, and ordinances that prevent, promote, or protect public health on the federal, state, and local levels?	75

6.1.3	Review existing public health laws, regulations, and ordinances at least once every five years?	75
6.1.4	Have access to legal counsel for technical assistance when reviewing laws, regulations, or ordinances?	100
6.2	Model Standard: Involvement in the Improvement of Laws, Regulations, and Ordinances <i>At what level does the local public health system:</i>	
6.2.1	Identify local public health issues that are inadequately addressed in existing laws, regulations, and ordinances?	25
6.2.2	Participate in changing existing laws, regulations, and ordinances, and/or creating new laws, regulations, and ordinances to protect and promote the public health?	25
6.2.3	Provide technical assistance in drafting the language for proposed changes or new laws, regulations, and ordinances?	25
6.3	Model Standard: Enforcement of Laws, Regulations, and Ordinances <i>At what level does the local public health system:</i>	
6.3.1	Identify organizations that have the authority to enforce public health laws, regulations, and ordinances?	50
6.3.2	Assure that a local health department (or other governmental public health entity) has the authority to act in public health emergencies?	50
6.3.3	Assure that all enforcement activities related to public health codes are done within the law?	100
6.3.4	Educate individuals and organizations about relevant laws, regulations, and ordinances?	25
6.3.5	Evaluate how well local organizations comply with public health laws?	50

ESSENTIAL SERVICE 7: Link People to Needed Personal Health Services and Assure the Provision of Health Care when Otherwise Unavailable

7.1	Model Standard: Identification of Personal Health Service Needs of Populations <i>At what level does the local public health system:</i>	
7.1.1	Identify groups of people in the community who have trouble accessing or connecting to personal health services?	50
7.1.2	Identify all personal health service needs and unmet needs throughout the community?	50
7.1.3	Defines partner roles and responsibilities to respond to the unmet needs of the community?	50
7.1.4	Understand the reasons that people do not get the care they need?	50

7.2	Model Standard: Assuring the Linkage of People to Personal Health Services <i>At what level does the local public health system:</i>	
7.2.1	Connect (or link) people to organizations that can provide the personal health services they may need?	75
7.2.2	Help people access personal health services, in a way that takes into account the unique needs of different populations?	75
7.2.3	Help people sign up for public benefits that are available to them (e.g., Medicaid or medical and prescription assistance programs)?	75
7.2.4	Coordinate the delivery of personal health and social services so that everyone has access to the care they need?	50

ESSENTIAL SERVICE 8: Assure a Competent Public and Personal Health Care Workforce

8.1	Model Standard: Workforce Assessment, Planning, and Development <i>At what level does the local public health system:</i>	
8.1.1	Set up a process and a schedule to track the numbers and types of LPHS jobs and the knowledge, skills, and abilities that they require whether those jobs are in the public or private sector?	25
8.1.2	Review the information from the workforce assessment and use it to find and address gaps in the local public health workforce?	25
8.1.3	Provide information from the workforce assessment to other community organizations and groups, including governing bodies and public and private agencies, for use in their organizational planning?	25
8.2	Model Standard: Public Health Workforce Standards <i>At what level does the local public health system:</i>	
8.2.1	Make sure that all members of the public health workforce have the required certificates, licenses, and education needed to fulfill their job duties and meet the law?	100
8.2.2	Develop and maintain job standards and position descriptions based in the core knowledge, skills, and abilities needed to provide the essential public health services?	75
8.2.3	Base the hiring and performance review of members of the public health workforce in public health competencies?	50
8.3	Model Standard: Life-Long Learning through Continuing Education, Training, and Mentoring <i>At what level does the local public health system:</i>	
8.3.1	Identify education and training needs and encourage the workforce to participate in available education and training?	50
8.3.2	Provide ways for workers to develop core skills related to essential public health services?	50
8.3.3	Develop incentives for workforce training, such as tuition reimbursement, time off for class, and pay increases?	25

8.3.4	Create and support collaborations between organizations within the public health system for training and education?	50
8.3.5	Continually train the public health workforce to deliver services in a cultural competent manner and understand social determinants of health?	50
8.4	Model Standard: Public Health Leadership Development <i>At what level does the local public health system:</i>	
8.4.1	Provide access to formal and informal leadership development opportunities for employees at all organizational levels?	50
8.4.2	Create a shared vision of community health and the public health system, welcoming all leaders and community members to work together?	50
8.4.3	Ensure that organizations and individuals have opportunities to provide leadership in areas where they have knowledge, skills, or access to resources?	50
8.4.4	Provide opportunities for the development of leaders representative of the diversity within the community?	50

ESSENTIAL SERVICE 9: Evaluate Effectiveness, Accessibility, and Quality of Personal and Population-Based Health Services

9.1	Model Standard: Evaluation of Population-Based Health Services <i>At what level does the local public health system:</i>	
9.1.1	Evaluate how well population-based health services are working, including whether the goals that were set for programs were achieved?	75
9.1.2	Assess whether community members, including those with a higher risk of having a health problem, are satisfied with the approaches to preventing disease, illness, and injury?	75
9.1.3	Identify gaps in the provision of population-based health services?	50
9.1.4	Use evaluation findings to improve plans and services?	75
9.2	Model Standard: Evaluation of Personal Health Services <i>At what level does the local public health system:</i>	
9.2.1	Evaluate the accessibility, quality, and effectiveness of personal health services?	100
9.2.2	Compare the quality of personal health services to established guidelines?	100
9.2.3	Measure satisfaction with personal health services?	100
9.2.4	Use technology, like the internet or electronic health records, to improve quality of care?	25
9.2.5	Use evaluation findings to improve services and program delivery?	75

9.3	Model Standard: Evaluation of the Local Public Health System <i>At what level does the local public health system:</i>	
9.3.1	Identify all public, private, and voluntary organizations that provide essential public health services?	100
9.3.2	Evaluate how well LPHS activities meet the needs of the community at least every five years, using guidelines that describe a model LPHS and involving all entities contributing to essential public health services?	75
9.3.3	Assess how well the organizations in the LPHS are communicating, connecting, and coordinating services?	25
9.3.4	Use results from the evaluation process to improve the LPHS?	75

ESSENTIAL SERVICE 10: Research for New Insights and Innovative Solutions to Health Problems

10.1	Model Standard: Fostering Innovation <i>At what level does the local public health system:</i>	
10.1.1	Provide staff with the time and resources to pilot test or conduct studies to test new solutions to public health problems and see how well they actually work?	50
10.1.2	Suggest ideas about what currently needs to be studied in public health to organizations that do research?	25
10.1.3	Keep up with information from other agencies and organizations at the local, state, and national levels about current best practices in public health?	75
10.1.4	Encourage community participation in research, including deciding what will be studied, conducting research, and in sharing results?	50
10.2	Model Standard: Linkage with Institutions of Higher Learning and/or Research <i>At what level does the local public health system:</i>	
10.2.1	Develop relationships with colleges, universities, or other research organizations, with a free flow of information, to create formal and informal arrangements to work together?	75
10.2.2	Partner with colleges, universities, or other research organizations to do public health research, including community-based participatory research?	25
10.2.3	Encourage colleges, universities, and other research organizations to work together with LPHS organizations to develop projects, including field training and continuing education?	75
10.3	Model Standard: Capacity to Initiate or Participate in Research <i>At what level does the local public health system:</i>	
10.3.1	Collaborate with researchers who offer the knowledge and skills to design and conduct health-related studies?	25

10.3.2	Support research with the necessary infrastructure and resources, including facilities, equipment, databases, information technology, funding, and other resources?	0
10.3.3	Share findings with public health colleagues and the community broadly, through journals, websites, community meetings, etc?	0
10.3.4	Evaluate public health systems research efforts throughout all stages of work from planning to impact on local public health practice?	0

APPENDIX B: Qualitative Assessment Data

Summary Notes

ESSENTIAL SERVICE 1: Monitor Health Status to Identify Community Health Problems			
STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
1.1	Model Standard: Population-Based Community Health Assessment (CHA)		
<p>The CHA is emailed to CHIP partners. Adequate time is given to complete CHA: 2 months Data is being compared to prior years There are posters in the community to promote completing the survey There are 17 Indicators identified There is prioritizing of data and indicators The CHA is based on community needs</p>	<p>Disseminating CHA: there is a breakdown in communication from CHIP partners to other agencies (example-school board), knowledge of state health priorities, knowledge of healthy people 2020, around 250 out of 360 WCHIP partners responded to survey</p>	<p>Get goals from Healthy People 2020, DOH can look at goals, get surveys to hospital staff and doctors offices, get base data and compare to prior year or two continuous improvement (nternal monitoring), sent via email, available on website</p>	<p>Providers look for benchmarks and goals for patient care. (example 10 year national goal), raise awareness of assessment survey, send information home with students and use incentives to increae completion of survey, mosquito contraol use door hangers, use property appraisers office and clerks office to share the information</p>

1.2	Model Standard: Current Technology to Manage and Communicate Population Health Data		
<p>Identities Accessibility and access to care, email results to wchip partners, florida charts: look for areas to help educate the community (example graphics to compare disease trends and averages), agency websites, availability of computers for public use</p>	<p>getting informaion to the frontline and the community, too much information sent out (too many emails), make data available to the public, geocode by zip code, census, or county</p>	<p>Internal organization assessments (Customer satisfaction surveys), manual bubble sheets in doctor's offices so surveys can be scanned electronicallym organizations share data wth DOH for more specific geographical locations, better communication on websites between organizations, information tailored to audience (community story boards and billboards)</p>	<p>Continuity of data sets between orrganizations, better communication, GIS mapping system, UWF has more software, Evaluation of data from other organizations, pinpointing accessibility issues</p>

1.3	Model Standard: Maintenance of Population Health Registries		
<p>DOH, Healthy Start, MD offices and Hospitals, DCF, EOC, Standards:Confidentiality, Registries:Florida Shots, Epidemiology, STI</p>	<p>Processes are not always followed, timely reporting by doctors (communicable diseases) , Confidentiality issues (depends on registry). Private providers not entering immunization records in Florida Shots. (This falls onto the schools and school health nurses), Communication of reportable diseases from DOH and providers to EOC for patients who are in special needs shelters, duplication of reporting from different agencies, breakdown of communication between agencies</p>	<p>Special needs shelter: export files monthly to registries to qualify patients better (EOC)</p>	<p>better communication between agencies of reporting to registries (child abuse and communicable diseases)</p>

ESSENTIAL SERVICE 2: Diagnose and Investigate Health Problems and Health Hazards

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
2.1	Model Standard: Identification and Surveillance of Health Threats		
Existing Partnerships Knowledgeable Staff Reporting Systems (Merline, Essence, State Warning Point, etc.)	Communication, Frequency of reporting, tobacco cessation, social media restrictions, education for the public (HIPPA-what to look for), Mental Health (emerging threats), Privacy vs Safety (HIPPA), Bioterrorism (no local team in county)	more referrals, fb promotions, clarify policies on reporting, \$ for updated equipment, need for local county team, more frequent hazmat drills	more partnerships, more referrals, fb promotion, \$ for specialized equipment and teams

2.2	Model Standard: Investigation and Response to Public Health Threats and Emergencies		
Developing written rules, maintaining written instructions/plans, practice, Incident Command	Practice/Evaluate (comunities come together), training, resources, new events (training historically developed from past occurences)	Need more review and/or follow up after incident	none listed

2.3	Model Standard: Laboratory Support for Investigation of Health Threats		
credential labs, written policies for handling samples	closer local lab	public labs certified so state can use	none listed

ESSENTIAL SERVICE 3: Inform, Educate, and Empower People about Health Issues

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
3.1	Model Standard: Health Education and Promotion		
Health Education:schools, community, churches, educating veterans. Classes: Smoking cessation, healthy coking, Get well network for admissions to hospitals, Health promotion through CHIP partners, educating providers about disease outbreaks and prevention, community events: 5210 promotion, child abuse prevention, helping hands, worlds's greatest baby shower, backpacks, screenings, press the chest	non mentioned	none mentioned	none mentioned

3.2	Model Standard: Health Communication		
<p>Healthy start, DOH, and DCF have communication plans, websites, brochures and educational materials. Social media used by agencies other than DOH. Epidemiology DOH has database of local providers for email alerts, blast fax, media list, Incident Command, PIO talking points spelled out by Tallahassee for DOH , Healthy start has 1 hour to respond to media, DCF. Sheriff, County office and DOH have a PIO, DOH has a trained PIO, DCF has trained Administrators as PIO's Healthy Start has monthly PIO training meetings, Conference: Darkness to light by CAC, Drowning and Safe Sleep by DCF, Outcome based/theory based education, provide policy makers and public with analysis</p>	none listed	non listed	non listed

3.3	Model Standard: Risk Communication		
Incident Command: Everbridge Serve Florida System, Updating emergency contacts, Voicemail messaging system, hand radios. Face to face meetings to discuss plans, texting, flipchart plan: emergencies, Ex. Active shooter plan, Reports to emergency management, established lines of authority, NIMS, Television/Media, Communications Committee, Phone emergency alerts, Safety Officers	none listed	sharing information about NIMS/Incident Command Structures, knowledge of situation reports to emergency management	none listed

ESSENTIAL SERVICE 4: Mobilize Community Partnerships to Identify and Solve Health Problems

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
4.1	Model Standard: Constituency Development		
<p>Zike Presentation, Immunization updates, WCHIP meetings, Coalition meetings (access) , CAT, 211 system Directory, Provider facebook page</p>	<p>Getting info to community, reach county wide engagement area agencies, general population awareness of 211 (north end), south end awareness of WCHIP, address unique needs in geographic areas, assumption community has electronic media access</p>	<p>Agency fair, county wide engagement, 211 agency advertisement</p>	<p>getting information to community, electronic media accessible to community</p>

4.2	Model Standard: Community Partnerships		
<p>WCHIP, BOCC, Animal Control, Healthy Start, COPE/DCF, Sacred Heart, Chamber of Commerce, Hospice, Mental, Jobs plus, Tricounty, Council on aging, Pancare, career source, law enforcement, 5210, surveys, re evaluations</p>	<p>community involvement, transportation, gap between south and north ends of the county</p>	<p>broader distribution of wchip evaluations</p>	<p>transportation, bridge north/south gap, media coverage</p>

ESSENTIAL SERVICE 5: Develop Policies and Plans that Support Individual and Community Health Efforts

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
5.1	Model Standard: Governmental Presence at the Local Level		
<p>DCF, Birth Certificates, Death Certificates and nutrition, WIC, school health screenings, Healthy start, Tax collectors, Vital Statistics ID's, DCF has PSA's, Tax collectors has a TV channel or videos playig in waiting area, Healthy start does home visits, parenting classes, smoking cessation classes, breast feeding support, DOH extra hours and after hours clinics, statewide public health messages, taxpayers participation outside agencies, sharing information with the public, statutes accreditation boards, standards, audits, monitor to make sure meeting standards. Services: Ob, environmental immunizations dental safe water, healthy start, community health, staff availability</p>	none listed	none listed	none listed

5.2	Model Standard: Public Health Policy Development		
<p>Tax collectors: updates of legislative changes, weekly meetings; DOH: Identify needsm guidelines for dealing with hazards, School Health: reviewing policies every 3-5 years and updating policies; (DOH: Ex Tobacco policies)</p>	none listed	none listed	none listed

5.3	Model Standard: Community Health Improvement Process and Strategic Planning		
<p>State plan and CHIP have some shared goals, DCF: Substance abuse/mental health efforts aligned</p>	<p>none listed</p>	<p>put state improvement plan and CHIP plan in alignment</p>	<p>none listed</p>

5.4	Model Standard: Plan for Public Health Emergencies		
coalition of community partners, emergency response plan revised every year, DCF: table tops, call downs, School: Fire Drills	none listed	none listed	none listed

ESSENTIAL SERVICE 6: Enforce Laws and Regulations that Protect Health and Ensure Safety

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
6.1		Model Standard: Review and Evaluation of Laws, Regulations, and Ordinances	
Keeping up with the laws	look for new issues -get local collaboration, Communication (come county ordinances not passed along), laws aren't always current	better communication between providers with HIPPA issues. (what is required vs. what is actually provided), better interpretation of what services can be given (waivers), tap into using more social mediam news, own agency to keep up to date information	none listed

6.2	Model Standard: Involvement in the Improvement of Laws, Regulations, and Ordinances		
EH has input into rules 7 reg with legislature	not all organizations can participate in changing laws	use EH model to gain participation in legislature to change laws/regulations	none listed

6.3	Model Standard: Enforcement of Laws, Regulations, and Ordinances		
Organization staying within laws	not all organizations know how to enforce laws, funding for more education has dropped, people over-educated via internet - often wrong information, time and man power	none listed	none listed

ESSENTIAL SERVICE 7: Link People to Needed Personal Health Services and Assure the Provision of Health Care when Otherwise Unavailable

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
7.1	Model Standard: Identification of Personal Health Service Needs of Populations		
<p>doh, pancare, sacred heart community health needs assessment tool, wee care, survey's, breff's phone survey</p>	<p>transportation, stigmatism, barriers to care, fear of health issues, providers accepting medicaid for area, access surveys, funding (meeting needs advertising)</p>	<p>Identify vulnerable population, go where target groups are, incentives</p>	<p>process to identify barriers to personal healthcare</p>

7.2	Model Standard: Assuring the Linkage of People to Personal Health Services		
navigators (er diversions), WCHIP, Discharge planners, cope, 211 resource, DOH gives sheer with community resources, emergent care, insurance specialists	gaps, no funding for referrals for abnormal results, follow up, tobacco referrals	ensure services provided in corret location (example er vs clinis)	none

ESSENTIAL SERVICE 8: Assure a Competent Public and Personal Health Care Workforce

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
8.1	Model Standard: Workforce Assessment, Planning, and Development		
none listed	participation-laws require certain standards	participation	participation

8.2	Model Standard: Public Health Workforce Standards		
none listed	awareness of public health competencies, lack of qualified applicants and job location	none listed	none listed

8.3	Model Standard: Life-Long Learning through Continuing Education, Training, and Mentoring		
none listed	Quality of training provided (I.e. webinars, no hands on experience etc) no incentive to continue education-no raise, but more responsibilities, don't always relate training with 10 services	none listed	none listed

8.4	Model Standard: Public Health Leadership Development		
none listed	Diverse leadership (weak on recruitment), willingness to participate, create the atmosphere of collaboration, but not all leaders will come together	Incentives	none listed

ESSENTIAL SERVICE 9: Evaluate Effectiveness, Accessibility, and Quality of Personal and Population-Based Health Services

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
9.1	Model Standard: Evaluation of Population-Based Health Services		
all ages/demographics, monthly review, DOH annual reviews (more often), County Health rankings, customer surveys, evaluating service delivery and adjusting accordingly	system abuse, SSI/Seniors benefits, funding	look at internal process	sufficient income for individuals to survive

9.2	Model Standard: Evaluation of Personal Health Services		
BRFFS, AHEC, LECOM, Pancare, CVHN, Physician portal, HEDIS/ FQHC, Patient advisory, Sacred Heart Council, Organizational survey's	lack of providers for personal healthcare, dental services, lack of connectivity between providers	On line referral program for Quit Tobacco, Connectivity between providers	Providing input from users of services and possible future users, connectivity between providers

9.3	Model Standard: Evaluation of the Local Public Health System		
<p>NACHO, ocal assessment process, WCHIP Involvement</p>	<p>local partners participation, assumption everyone knows what everyone is doing, countywide engagement</p>	<p>updated participants list, evaluate relationships that comprise LPHS, facebook page, ESF meetings, survey why participants did not attend assessment</p>	<p>evaluate relationships that comprise LPHS</p>

ESSENTIAL SERVICE 10: Research for New Insights and Innovative Solutions to Health Problems

STRENGTHS	WEAKNESSES	OPPORTUNITIES FOR IMMEDIATE IMPROVEMENT / PARTNERSHIPS	PRIORITIES OR LONGER TERM IMPROVEMENT OPPORTUNITIES
10.1	Model Standard: Fostering Innovation		
School Health, Healthiest Weight/BMI class in high schools, diabetes A-1C, garden in a bucket, sacred heart get well project	Sharing Best Practices	none listed	none listed

10.2	Model Standard: Linkage with Institutions of Higher Learning and/or Research		
best practices maternal fetal Sacred Heart, DOH LPN?Nurse Practitioners, DCT, Statewide program Smoking during pregnancy, Lecom Internship education only	none listed	none listed	none listed

10.3	Model Standard: Capacity to Initiate or Participate in Research		
Clinical trials-Dr Howell, Dr Chapman, Workforce training	none listed	none listed	none listed
