LETTER TO COMMUNITY

The Florida Department of Health in Walton County (DOH-Walton) and the Walton Community Health Improvement Partnership (WCHIP) believe that all Walton County residents should have the opportunity to make the choices that allow them to live a long, healthy life, regardless of their income, education, ethnic background or abilities. This plan uses the prioritized health issues from the 2019 Community Health Assessment (CHA) for Walton County, Florida and addresses some of the root causes to those issues.

The findings from our 2019 CHA helped identify top health issues facing our community. Through collective input, goals, strategies, and objectives were developed to address these issues in order to reach our vision of a healthy and connected Walton County. The plan will be implemented over the next few years and will be reviewed annually to monitor the progress being made. Based on the top health issues outlined in the 2019 CHA, WCHIP partners chose the four priorities for 2020-2022 Community Health Improvement Plan, which are:

- Healthy Homes
- Healthy Places
- Healthy People
- Healthy Behaviors

We would like to thank our community members and partners for their dedication and participation in the development of this county-wide plan. As a member of the community, we invite you to attend an upcoming WCHIP meeting. To become involved, contact WCHIP at wchip@flhealth.gov or visit walton.floridahealth.gov.

A Healthy Walton Begins Today!
Join the Movement!
The Florida Department of Health in Walton County (DOH-Walton) and the Walton Community Health Improvement Partnership (WCHIP) initiated a new community health improvement process in 2019. Over the past year, local public health system partners joined forces to develop the 2020-2022 Walton County Community Health Improvement Plan (CHIP). A CHIP is a strategic plan to address public health priorities in a community and defines how DOH-Walton and public health system partners will work together to improve the health of Walton County. Critical sectors invited to participate in the development of Walton County’s CHIP included local hospitals and health care organizations, local government, community-based organizations, social service organizations, and schools.

Utilizing the National Association of City and County Health Official’s (NACCHO) Mobilizing for Action through Planning and Partnerships (MAPP) framework, the planning team engaged in a comprehensive community health assessment (CHA). The findings from the CHA were reviewed, analyzed, and synthesized to inform the development of Walton County’s CHIP. Strategic health priorities were identified through a facilitated process that examined crosscutting strategic issues that emerged in the CHA. When establishing health priorities for Walton County’s CHIP, feasibility, impact on health outcomes, and the promotion of health equity and the social determinants of health were considered.

Through this process, four strategic priorities were identified for Walton County’s CHIP:

- **Healthy Homes**: Healthy homes promote good physical and mental health. Good health depends on having homes that are safe and free from physical hazards. In contrast, poor quality and inadequate housing contributes to health problems such as chronic diseases and injuries, and can have harmful effects on childhood development.

- **Healthy Places**: The built environment includes all of the physical parts of where we live and work (e.g., homes, buildings, streets, open spaces, and infrastructure). The built environment influences a person’s level of physical activity. For example, inaccessible or nonexistent sidewalks and bicycle or walking paths contribute to sedentary habits. These habits lead to poor health outcomes such as obesity, cardiovascular disease, diabetes, and some types of cancer.

- **Healthy People**: Disparities in health outcomes exist in specific groups of people. When exploring preventable injuries, chronic diseases, and infectious diseases, specific populations are more at-risk or vulnerable. Defining characteristics of these populations include age, sex, geography, race, ethnicity, or income.

- **Healthy Behaviors**: Behavioral health is essential to a person’s overall health and wellbeing, interpersonal relationships, and ability to live a full and productive life. Mental illness can influence the onset, progression, and outcome of other illnesses and often correlates with health risk behaviors such as substance abuse, tobacco use, and physical inactivity.

These priorities guided the development of goals, objectives, and key activities that will be implemented to promote optimal health and well-being for all who live, work, learn, play, and pray in Walton County. The result of the MAPP process is a well-crafted roadmap that we will review and revise annually to meet emerging challenges and opportunities.
WALTON COMMUNITY HEALTHY IMPROVEMENT PARTNERSHIP

2020-2022 COMMUNITY HEALTH IMPROVEMENT PLAN

STRATEGIC PRIORITIES

STRATEGIC PRIORITY 1
Healthy Homes

GOALS:
• Increase capacity for affordable housing.
• Improve housing stability through supportive services for vulnerable populations, including older adults, people with disabilities, homeless people, and individuals and families at risk of becoming homeless.

STRATEGIC PRIORITY 2
Healthy Places

GOALS:
• Improve the built environment to support healthy lifestyles of individuals across the lifespan.
• Increase collaboration across sectors to reduce barriers to health.

STRATEGIC PRIORITY 3
Healthy People

GOALS:
• Prevent and reduce intentional and unintentional injuries and deaths.
• Prevent the spread of disease through prevention and community education.

STRATEGIC PRIORITY 4
Healthy Behaviors

GOALS:
• Reduce substance use through prevention and community education.
• Increase awareness of mental health and substance use disorder services.
• Reduce illness, disability, and death related to tobacco use.

A #HEALTHYWALTON BEGINS TODAY! JOIN THE MOVEMENT!
WCHIP@FLHEALTH.GOV | WALTON.FLORIDAHEALTH.GOV | WCHIP@FLHEALTH.GOV
METHODS

The 2019 Community Health Assessment (CHA) was conducted by the Florida Department of Health in Walton County (DOH-Walton) in support of the Walton Community Health Improvement Partnership (WCHIP). Created in part to guide a community health improvement planning process, WCHIP is an independent collaborative made up of various community members and organizations that serve Walton County.

This assessment details the top health issues for Walton County after consideration of all the data collected. To develop the CHA, we used the Mobilizing for Action through Planning and Partnerships (MAPP) model. The MAPP model is made up of four assessments that help identify public health issues in our community.

In 2018-2019, DOH-Walton held meetings every month with partner agencies to organize and coordinate the assessment data collection process. Additionally, the DOH-Walton staff reviewed local and state health assessments for methodology and data collection comparisons. Various data profiles from FLHealthCHARTS, Florida Department of Health’s Community Health Assessment Resource Tool Set, were used to find relevant data regarding diseases, health behaviors, and social determinants of health. The CHA yielded the top eight health issues for Walton County: substance use, mental health, housing, preventable injuries, healthy food access, education, vaccine-preventable diseases, and poverty.

Through voting, WCHIP partners then decided which of the top health issues to adapt to priorities for the 2020-2022 Community Health Improvement Plan. Partners decided to keep the priorities broad to allow flexibility for potential emerging issues during the plan’s time frame.

A FOCUS ON THE SOCIAL DETERMINANTS OF HEALTH

Health begins where you live, learn, work, play, and pray. All Walton County residents should have the opportunity to make the choices that allow them to live a long, healthy life, regardless of their income, education, ethnic background or abilities. It is important to work toward raising the bar for all so that everyone can have the opportunity to make healthy choices.

The majority of our health is determined by social, economic and environmental factors. These “social determinants of health” strongly influence health behaviors, access to clinical care, and even our genes and biology. Income, education, housing and transportation create opportunities or barriers to health. This plan address these social determinants of health within each of the priorities.

Policy is a critical tool for changing environments. The goal is to create a systematic approach through informed policy changes by local government, thereby addressing a root cause of health inequities. Needed policy changes for the priorities are featured on pages 19-26.
MAPP PROCESS

Phase 1: Organize for Success/Partnership Development
Lead organizations begin planning the MAPP process and enlisting other community organizations to participate in the process.

Phase 2: Visioning
The community develops a shared vision for Walton County and common values to determine an ideal end point for the MAPP process.

Phase 3: The Four MAPP Assessments
1. Forces of Change Assessment: The impact of forces, such as legislation and technology, that affect the context of the community are evaluated.
2. Local Public Health System Assessment: Comprehensively examines organizations from across multiple sectors and their contribution to the public's health.
3. Community Themes and Strengths Assessment: Examines health issues Walton County residents feel are important and the assets the community possesses to address those issues.
4. Community Health Status Assessment: Investigates health outcomes and quality of life at a detailed level. Health issues are identified and highlighted by gathering data for a variety of indicators and analyzing differences across time periods, among population subgroups, or with peer, state, or national data.

Phase 4: Identify Strategic Issues
This phase takes data from all four assessments and identifies the most critical issues that must be addressed for Walton County to achieve its vision.

Phase 5: Formulating Goals and Strategies
After identifying a list of strategic issues, broader goals addressing these issues are created and specific strategies to meet these goals are developed.

Phase 6: Action Cycle
Strategies are planned, implemented, and evaluated in a continuous cycle which celebrates successes and adapts to new challenges.

Strongest Performance
Inform, Educate, and Empower People About Health Issues
This Essential Public Health Service centers around planning and implementing initiatives using health education and communication sciences to build knowledge and shape attitudes, inform decision-making choices, and develop skills and behaviors for healthy living.

Weakest Performance
Assure a Competent Public and Personal Health Care Workforce
This Essential Public Health Service centers around assessing the public health and personal health workforce by maintaining public health workforce standards, using public health competencies, providing continuing education and life-long learning opportunities, and facilitating leadership development.

COMMUNITY THEMES & STRENGTHS
Conducted May 1, 2019 – July 31, 2019

KEY INFORMANT INTERVIEWS Key Informants are listed on page 4

Top Important Issues that Must Be Addressed to Improve Health
1. Affordable and healthy housing
2. Opportunities to live healthy lives (at home, work, and school)
3. Drug and alcohol use
4. Access to medical and behavioral health care
5. Flexible and affordable public transportation
6. Dependable jobs families with livable wages

### Forces (Trends, Events, Factors)

**Walton County Demographics**
- Aging population
- Global travel
- Steadily increasing new residents
- Limited affordable housing
- Improving education system
- Increasing new businesses and economic development

**Opportunities**
- More focus on addressing issues such as the homeless, poverty, and older adults in the community.
- Ability to leverage area volunteer programs to increase civic participation in the community.
- Local government has a focus on bettering economic development opportunities to drive community growth.
- Increasing focus in the field of public health on minority health and health equity.
- More focus on addressing issues such as the homeless, poverty, and older adults in the community.

**Threats**
- Increasing population and global travel offers more possibility of environmental issues and communicable disease spread.
- Increasing drug use within community with novel types of drugs that healthcare providers might not be educated on.
- Lack of specific community resources (i.e., geriatric dental, urgent care centers, mental health treatment).
- With the increase in residents and tourists, there is an increased likelihood of individuals potentially coming in contact with bacteria or algal blooms that cause illness (i.e., Vibrio, enterococci, red tide, etc.).
- Lack of affordable housing locally continues to be an increasing problem, which then affects the workforce, the ability to seek and obtain proper healthcare, and transportation.
- Increasing homeless and aging population
- Limited control to offer competitive wages to employees.
- Extreme socioeconomic differences between North and South Walton County.

**Walton County Geography**
- Rural areas with limited transportation
- Population split between North and South Walton County
- Coastal Location (hurricanes, tourists, etc.)

**Opportunities**
- Telehealth services are increasing in popularity, which could help with access to care needs.

**Threats**
- Lack of specific community resources (i.e., geriatric dental, urgent care centers, mental health treatment).
- Walton County residents are susceptible to potential deadly endemic diseases (i.e., rabies, West Nile virus, etc.).
- Limitations on public transit and control over transportation

**Funding**
- Limited allocated funding for community public health initiatives
- Changes in Medicaid

**Opportunities**
- Increasing national, state and local focus on substance use and mental health with increased funding for community resources for prevention and intervention.

**Threats**
- No control over possible budget changes.
- Uncontrollable managed Medicaid changes to contract winners.
- Limited control to offer competitive wages to employees.

**Partnerships and Communication**
- Access to technology
- Lack of awareness of sexual health issues

**Opportunities**
- Possibility of a formalized network to allow "smooth" transition of services from one agency to another (i.e., inmate releases).
- Increasing participation among community partners and ability to increase interagency communication.
- Ability to increase local community leaders’ and partners’ awareness of health equity and the social determinants of health. Increasing focus in the field of public health on minority health and health equity.
- Increasing emphasis on disease prevention and healthy living including diet, exercise and mental health.

**Threats**
- Public unawareness of the importance of routine services for males.
- Decision-makers not always at the table for important public health discussions.
- Lack of community knowledge, education, communication and media resources within Walton County (i.e., "Walton County is a media black hole").

**Social**
- Strong faith-based community
- Growing numbers of “communities”
- Limited social outlets for children and young adults
- Segmented generational populations
- Social media

**Opportunities**
- Increasing community focus on stigmatized public health issues such as mental health, substance use, and HIV lead to opportunities to break stigmas and have conversations.
- Robust religious community that could be leveraged to build educational awareness for parents, specifically families of different racial or ethnic backgrounds.

**Threats**
- Younger generation being less responsible for their actions and the increase in their use of technology to “fix” everything.
- Teenagers have “nothing to do” because there are limited area entertainment opportunities.
OUR DEMOGRAPHICS

Certain populations tend to experience adverse health outcomes or have different health needs based on demographics. Key populations that can be at risk and should be monitored include the following:

Older Adults

Tracking the population of older adults is important because this population has unique health needs, which should be considered separately from other age groups. Walton County’s older adults is one of the fastest growing demographics.

People Living in Poverty

Living in poverty creates barriers for achieving optimal health. People living in poverty are less likely to have the education needed to earn higher income. Examples include limited access to health services, healthy food, safe and affordable housing, and other necessities to living a healthy life.

People with Disabilities

Until recently, people with disabilities have been overlooked in public health surveys, data analyses, and health reports. Emerging data indicate that individuals with disabilities experience health disparities in health behaviors, clinical preventive services, and chronic conditions. Walton County has a higher percentage of individuals with disability status, compared to Florida and the United States.
Over the next decade, Walton County is expected to grow by nearly 21%, from 74,071 in 2019 to 89,478 in 2030, which is above the state of Florida’s expected growth rate (6.8%). Walton County has slightly more males (50.5%) than females (49.5%). The population is also predominantly White (90%) and has a growing Hispanic population (7%), which is expected to almost double over the next decade. The median age in 2019 is 44.0 years old, slightly higher than the state of Florida overall (42.5). The percentage of residents age 25 years old or older living in the community with an education with that is a high school graduate or higher (89.1%) is higher than the state of Florida (88.2%) and nation (88.0%). From 2015 to 2019, the top ten leading causes of death for Walton County during are:

“"I believe a healthy community is one in which all residents have access to a quality education, safe and healthy homes, adequate employment, transportation, access to physical activity, and nutrition, in addition to quality health care.”" - Key Informant

Out of the top five leading causes of death in Walton County, four are chronic diseases largely caused by poor health habits and lifestyle choices, such as poor diet, lack of exercise, and tobacco use. Health is influenced by conditions where we live and the ability and means to access healthy food, good schools, affordable housing, and jobs. Unfortunately, significant gaps in life expectancy persist across many United States cities, towns, ZIP codes and neighborhoods. In Walton County, there are numerous zip codes that have higher rates of poverty and lower life expectancy: 32433, 32464, 32435, 32455, 32539, and 32567. The largest health disparities for our county are related to gender, race, income and education. For example, in Walton County:

- Nearly 50% of all cancer deaths from 2015 to 2019 were related to tobacco use.
- Residents without a high school diploma are most likely to smoke cigarettes (34.7%) compared to residents with a high school diploma (16.8%) and residents with more than a high school education (10.0%)
- Out of the residents that died by suicide, 9 out of 10 were White male residents.
- Black residents are twice as likely to die from diabetes than White residents.
- White residents of Walton County (88.5%) are more likely to have any type of health insurance compared to Black residents (87.9%) and Hispanics (68.6%)
- Out of the 34 females that died from breast cancer from 2015 to 2019, all of them were White residents.
- Male residents are nearly twice as likely to die from unintentional injury (70.3 per 100,000) compared to female residents (38.5 per 100,000).
- Those with annual incomes under $25,000 (37.0%) are less likely to see a doctor due to cost compared to those with incomes between $25,999 to $49,999 (19.9%) and those with incomes $50,000 and higher (3.7%)
- Female residents are nearly twice as likely to die from Alzheimer’s disease (30.0 per 100,000) compared to male residents (16.8 per 100,000).

PRIORITIZATION
Conducted: September 18, 2019

On September 18, 2019, DOH-Walton and WCHIP convened a meeting of approximately 35 community partners. Attendees were educated on the MAPP process, health equity, social determinants of health and the connection between health outcomes. An abbreviated version of the 2019 CHA was presented to the attendees by the WCHIP Steering Committee and other subject matter experts.

CHA pages were reviewed based on the "top health issues" identified by the WCHIP Steering Committee upon review of the MAPP assessments, which included substance use, mental health, housing, preventable injuries, healthy food access, education, vaccine-preventable diseases, and poverty. The social determinants of health and addressing health inequities were featured in aspects of top health issues and heavily considered in the prioritization process of this plan.

Following the review of the CHA and the top health issues, attendees voted to select the final priority areas that would form 2020-2022 Community Health Improvement Plan (CHIP) work groups. Posters were placed around the room, and each of the attendees had two votes, signified by colored stickers, for their first and second choices for priorities. For a CHIP workgroup to be finalized, there had to be at least one community member “lead.” Each workgroup was also assigned a DOH-Walton staff member as a facilitator. Leads also serve on the WCHIP Steering Committee to share what their group is working on and the progress that has been made.

Upon completion of voting, attendees then discussed whether or not some of the top health issues were connected or made sense being categorized together into one workgroup. The attendees chose to combined substance use with mental health, preventable injuries with vaccine-preventable diseases, and housing with poverty.

The following priorities were selected as CHIP workgroups:

- Healthy Homes
- Healthy Places
- Healthy People
- Healthy Behaviors
FORMULATING GOALS & STRATEGIES
Conducted: November 13, 2019

On November 13, 2019, DOH-Walton and WCHIP convened the 2019 Healthy Walton Summit to formulate goals and strategies for each of the defined priorities. Over 70 community members attended and joined the discussion to guide the 2020-2022 CHIP.

The Healthy Walton Summit’s agenda included a presentation to overview the State Health Improvement Plan, a discussion panel, and workgroup breakouts. The discussion panel included representatives from the City of Freeport, Chautauqua Healthcare Services of Lakeview, AARP Florida, Walton County Planning and Development Services, Walton County School District, Walton County Sheriff’s Office, City of DeFuniak Springs, and the Walton Community Health Center. The discussion panel was facilitated by a local religious and community leader from Caring and Sharing of South Walton.

During the breakouts, workgroups were tasked with identifying assets (i.e. What programs/services exist?, Which organizations or groups provide related programs/services?, Are those groups/organizations here today?) and identifying gaps (i.e. What should the community be doing to address the priority area?, What programs/services does our community need?, Which organizations should play a role?)

To conclude the Healthy Walton Summit, WCHIP Steering Committee reviewed the activities and achievements completed from the 2017-2019 CHIP.

With the publication of the Community Health Improvement Plan 2020-2022, the chosen CHIP workgroups will continue to meet during the implementation phase of the action plans. Annual evaluation and reports will be published to provide the community with updates on progress toward achieving the goals.
2020 YEAR IN REVIEW

This year emphasized the importance of collaboration and partnership to better our community’s health. WCHIP has stepped up to make sure that our community is protected from a new pandemic threat, COVID-19. The local response to the pandemic illustrates the local public health system at work to not only protect our public’s physical health—but also the public’s emotional, economic, educational, spiritual, and social health.

From fighting food insecurity to promoting healthy behaviors like handwashing and staying home if sick, WCHIP partners have carried out essential public health services in ways that helped combat the community issues that were magnified and amplified due to COVID-19. Community partners stepped up to the challenges and coordinated resources to best serve the public. Having a strong and robust partnership allowed us to utilize the connections that were already existing. WCHIP had to re-strategize our community, steering committee, and workgroup meetings to ensure social or physical distancing recommendations. Virtual meetings were implemented starting in June 2020.

Though many of these WCHIP activities were related to the local COVID-19 response this year, there were successes for each of the four priority workgroups that kept on track with what the partnership prioritized as priorities at the 2019 Healthy Walton Summit. Those successes are outlined in the following pages corresponding with the workgroups.

DOH-Walton provided 2,000 masks to the Matrix Community Outreach Center to include in their food distribution efforts. In June 2020, WCHIP distributed over 40,000 cloth face masks to the public. Masks went to older adults, individuals with underlying medical conditions, families experiencing poverty and food insecurity, and service industry employees. This was to promote mask wearing as a COVID-19 primary prevention strategy.

Stephen Brown and Stephanie McMinn, members of the Walton County Prevention Coalition, collected unused and expired medications for safe disposal in partnership with the Walton County Sheriff’s Office. On October 24, 2020, over 70 pounds of medications was collected for National Prescription Drug Take Back Day.
In preparation of the flu season, WCHIP provided Flu Prevention Toolkits to local businesses and promoted the Healthy Walton Worksites initiative. The toolkits included bathroom mirror clings to promote proper handwashing, indoor and outdoor signage, and information to help keep employees healthy during flu season. COVID-19 information was also included.

In the months of October and November, the UF/IFAS Walton County Extension Office collected over 500 pounds of peanut butter for the annual community challenge. WCHIP partners helped collect jars throughout Walton County. The amount collected will be matched by the Florida Peanut Growers Association and distributed to local food pantries to feed neighbors in need.

To prepare for the expected COVID-19 vaccine, DOH-Walton provided a mass vaccination exercise using the flu vaccine. WCHIP partners helped with providing volunteers and sharing the event details with their clients, including older adults and those at-risk of severe illness. The exercise assisted in identifying lessons learned regarding logistics, operations, and mass communication strategies, and other methods to better plan for the COVID-19 vaccine roll-out.
PRIORITY 1: HEALTHY HOMES

"Walton County still has residents living with dirt floors and no electricity."

- Key Informant

2020 Progress and Successes
DOH-Walton and Walton County Board of County Commissioners participated in the National Association of County Official's Housing and Health Action Learning Cohort in 2020. WCHIP aligned all objectives within the action plan for the Housing and Health Cohort to the 2020-2022 CHIP. The Housing and Health Cohort seeks to:

1. Support counties in their exploration, learning and action in understanding the impact of housing quality, stability, affordability, and neighborhood on county health outcomes.
2. Equip county officials and staff with the information necessary to make informed decisions towards better housing and health for their residents.
3. Develop individual housing and health roadmaps to assist counties in addressing housing challenges in their communities through a health equity lens.
4. Establish a county peer learning network on the intersection of housing and health

WCHIP also promoted the use of the Homeless Management Information System among local social service agencies to better coordinate resources and information for those experiencing or at-risk of homelessness

Workgroup Focuses
- Affordable and safe housing
- Homelessness
- Housing instability
- Poverty
- Coordination of community services
- Employment

Community Assets and Resources
- State Housing Initiatives Partnership (SHIP)
- Rural development/HUD
- Florida Housing Financing Corporation
- Density Bonus Program
- Private donations
- Emergency shelter grants
- Opportunity zones
- Community Reinvestment Act
- Homelessness and Housing Alliance – Continuum of Care
- Case manager providers
- Community of Transformation Program
- Some transitional housing
- eCivis
- Weatherization Programs
- Walton County Affordable Housing Advisory Committee
GOAL 1.1: INCREASE CAPACITY FOR AFFORDABLE HOUSING

**Strategy 1.1.1**: Assist local government with planning and development of affordable housing through policy and systems changes.

**Objective 1.1.1A**: By June 30, 2020, inventory and evaluate existing properties with land use designations that address affordable housing. *Baseline: 0 (2019)*

**Objective 1.1.1B**: By December 31, 2022, inventory existing county properties which could be surplus and available for affordable housing sites. *Baseline: 0 (2019)*

**Objective 1.1.1C**: By December 31, 2022, create an overlay district showing mixed-use areas for economic development and affordable housing. *Baseline: 0 (2019)*

**Objective 1.1.1D**: By December 31, 2022, develop a mobility plan to support residents with alternative transit operations to get to jobs or community assets. *Baseline: 0 (2019)*

**Strategy 1.1.2**: Promote affordable housing development among real estate developers and home builders.

**Objective 1.1.2A**: By June 30, 2021, host a lunch-and-learn for area developers to discuss incentives for affordable housing. *Baseline: 0 (2019)*

GOAL 1.2: IMPROVE HOUSING STABILITY THROUGH SUPPORTIVE SERVICES FOR VULNERABLE POPULATIONS, INCLUDING OLDER ADULTS, PEOPLE WITH DISABILITIES, HOMELESS PEOPLE, AND INDIVIDUALS AND FAMILIES AT RISK OF BECOMING HOMELESS

**Strategy 1.2.1**: Enhance systems and programs to coordinate community resources effectively.

**Objective 1.2.1A**: By December 31, 2022, establish a partnership within Walton County to administer the Communities of Transformation program to help move families away from instability, isolation, and dependence, and toward self-sufficiency. *Baseline: 1 (2019)*

**Objective 1.2.1B**: By December 31, 2022, increase the number of social services agencies using the Homeless Management Information System from 8 (2019) to 12. *Baseline: 8 (2019)*

**Objective 1.2.1C**: By June 30, 2021, research and determine feasibility of a triage center for resource coordination among local social service agencies. *Baseline: 0 (2019)*

**Owner**: Dianne McManus, Homelessness and Housing Alliance

**Owner**: Emily Proctor, Caring and Sharing of South Walton

"The beauty of our environment is one of our community’s greatest resources."
- Key Informant

2020 Progress and Successes
During the 2020 calendar year, the Walton Community Health Improvement Partnership (WCHIP) identified Faithful Families as a best practice for health promotion to implement locally and established a community partner to lead the initiative. Faith communities play a special role in supporting their community’s health and decreasing health disparities.

WCHIP also started planning the Walton County Parks initiatives to promote parks that are designed for all ages and abilities. Criteria has been drafted and submitted for review by local government parks representatives to determine feasibility of criteria components.

Disruptions in domestic food supply chains, other circumstances affecting food production, and losses of incomes create strong tensions and food security risks in many households. In response to the COVID-19 pandemic, WCHIP partners such as the Matrix Community Outreach Center, Catholic Charities of Northwest Florida, Caring and Sharing of South Walton, and others, increased food distribution to combat food insecurity in the community.
### GOAL 2.1: IMPROVE THE BUILT ENVIRONMENT TO SUPPORT HEALTHY LIFESTYLES OF INDIVIDUALS ACROSS THE LIFESPAN

**Strategy 2.1.1:** Identify practical improvements, new interventions, and health promotion enhancements to the built environment.

<table>
<thead>
<tr>
<th>Objective 2.1.1A:</th>
<th>By December 31, 2022, recognize two local parks that meet the Healthy Walton Parks criteria. <strong>Baseline:</strong> 0 (2019)</th>
<th><strong>Owner:</strong> Jill Breslawski, UF/IFAS Extension Office</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective 2.1.1B:</td>
<td>Annually, attend at least 75% of the scheduled Community Traffic Safety Team meetings to support local governments in traffic enhancement. <strong>Baseline:</strong> 36% (2019)</td>

Polly Bennett, DOH Children Medical Services
Randy Fleming, Florida Department of Children and Families
Donna Free, Walton County Emergency Management

2020 Progress and Successes
Most of the 2020 activities for this workgroup were postponed due to the community response to the COVID-19 pandemic. Members of DOH-Walton, Walton County Board of County Commissioners, Walton County Emergency Management, the Walton County School District, Walton County Fire Rescue, South Walton Fire District, the City of Defuniak Springs, Point Washington Medical Clinic, and Northwest Florida State College were involved in coordinating efforts to curb the spread of the novel coronavirus and provide testing locations easily accessible for the public.

The local public health system partners were required to be adaptable and quick to respond to the evolving information as the pandemic progressed. Response activities such as large-scale PCR testing and mask distribution were the result of successful collaboration throughout the whole community. During 2020, DOH-Walton helped to distribute over 40,000 face masks and administered over 10,000 COVID-19 tests throughout the county.

Workgroup Focuses
• Fall prevention
• Motor vehicle injury prevention
• HIV/AIDS
• Infant mortality
• Infectious diseases
• Vaccine hesitancy

Community Assets and Resources
• Senior fall prevention programs through home health/hospice agencies
• Tai Chi with AHEC
• New texting and driving law, school education programs
• Ongoing flu prevention activities seasonally
• Healthy Babies initiative
• Tobacco prevention (SWAT, Walton County Prevention Coalition, and AHEC)
• Walton County Sheriff’s Office Teen Driving Program
• OASIS Florida with HIV prevention
• Car seat safety classes (Healthy Start, UF/IFAS)
• AARP CarFit Program
## GOAL 3.1: PREVENT AND REDUCE UNINTENTIONAL INJURIES AND DEATHS

<table>
<thead>
<tr>
<th>Strategy 3.1.1: Establish and coordinate injury prevention campaigns to reduce disparities in at-risk populations.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective 3.1.1A:</strong> By December 31, 2022, reduce the motor vehicle crashes rate from 2,048.4 per 100,000 (2017) to 1,950.0 per 100,000. <strong>Baseline:</strong> 2,048.4 (2017)</td>

Tamara Bogle, Walton County Sheriff’s Office
Emily Proctor, Caring and Sharing of South Walton

"Drug and alcohol-use needs to be addressed to improve the health and quality of life."

- Key Informant

2020 Progress and Successes
DOH-Walton and the Walton County Prevention Coalition coordinated local participation in the Drug Enforcement Administration’s “National Takeback Day”. This initiative addresses a vital public safety and public health issue by providing the public the opportunity to rid their homes of potentially dangerous expired, unused, and unwanted prescription drugs.

Medicines that languish in home cabinets are highly susceptible to diversion, misuse, and abuse. Rates of prescription drug abuse in the United States are alarmingly high, as are the number of accidental poisonings and overdoses due to these drugs. In addition to the drop box located at the Walton County Sheriff’s Office, a new drop box location was made available at the DeFuniak Springs Police Department.

Workgroup Focuses
- Mental health
- Substance use
- Access to behavioral health services
- Tobacco use

Community Assets and Resources
- Substance use treatment in the county jail
- Opioid Abuse Resilience Support (OARS) support group
- NARCAN Community Program
- Community opioid training.
- Tobacco prevention in community (smoke-free worksites, SWAT, etc.)
- Local tobacco cessation classes
- Opening home at Santa Rosa Beach for addiction and sex trafficking
- Free prescription program for Medication-Assisted Treatment (MAT)
- PanCare expanding mental health services in Freeport
- Addiction resource list.
- Healthy Start Family Resource Directory
- Local peer support group for mental health diagnosis
## GOAL 4.1: REDUCE SUBSTANCE USE THROUGH PREVENTION AND COMMUNITY EDUCATION

**Strategy 4.1.1:** Enhance community partnerships to identify, prevent, and reduce the substance use and disparities in at-risk populations.

<table>
<thead>
<tr>
<th>Objective 4.1.1A</th>

APPENDICES
APPENDIX 1: MONITORING PLAN

To hold DOH-Walton staff and WCHIP partners accountable, the action plans will be monitored on a quarterly basis at scheduled WCHIP Steering Committee meetings. Workgroup leads and facilitators will work together to make sure action plans are up-to-date and include all vital information for tracking progress. This monitoring tool will reflect the status of each action step within each action plan, and will track progress on the process and outcome indicators.

Additionally, the WCHIP Steering Committee will host an annual review meeting each November to review the progress made on the action plans and to make amendments as needed. The WCHIP Steering Committee will update the CHIP annually based on the feedback from the annual review meeting. The internal DOH-Walton Performance Management Council will monitor progress of the CHIP action plans quarterly. Figure 1.1 provides an illustration of the CHIP implementation and monitoring process for the 3 year cycle (1/1/2020 – 12/31/2022). An example monitoring tool is included on the next page.

</tr>
</tbody>
</table>

**Complete** = Action Step is complete on or after the target date.

**On Schedule** = No changes/delays and no scope changes.

**At Risk** = Action Step needs some attention; milestones in action step are maybe being met, but results are not as anticipated.

**Not On Schedule** = It looks like the Action Step will not be met by the target date. Action Step may take longer to complete than originally anticipated.

**Not Feasible** = Action Step has been excluded from the Action Plan.
